MOTORIZED BALL VALVE SERIES MBA120

The ESBE series MBA120 consist of motorized 2-way ball valves available in DN 20-32, PN32 with internal thread or combination of internal and external thread connection.

OPERATION

The ESBE series MBA120 is a range of 2-way motorized ball valves with actuator for use in heating and cooling system. The valve is air bubble tight according to EN12266-1

The actuator is controlled by 2-point signal and is recommended for on/off function, available for 230V AC, 50 Hz power supply. Actuator is supplied with 0.85 meter connection cable attached, auxiliary switch and an anti condensation resistor to prevent condensation on the electronic circuit board.

Actuator is assembled on the ball valve with a metallic spigot that allows to assembly/disassembly the actuator in a secure, simple and rapid way. The ball valve and actuator has an operating range of 90°.

DIMENSIONING

HEATING APPLICATION IN GENERAL, EXAMPLE RADIATOR OR UNDERFLOOR HEATING SYSTEMS

Start with the heat demand in kW (e.g. 25 kW) and move vertically to the chosen Δt (e.g. 5°C).

Move horizontally to the pressure drop lines and select Kvs-value (e.g. 20,0). A valve with suitable Kvs-value will be found in respective product description.

OTHER APPLICATIONS

Make sure maximum ΔP is not exceeded 2 bar to avoid noises.
