DRAINING VALVE
SERIES VDA100

ESBE draining valves for boilers, hot water tanks, pipes etc.
Opens automatically when connecting a hose nipple.

VDA100
External thread

OPERATION
The valve is intended for the draining of boilers, hot water tanks and other liquid containers, as well as pipe systems. The article series VDA100 has brass caps.

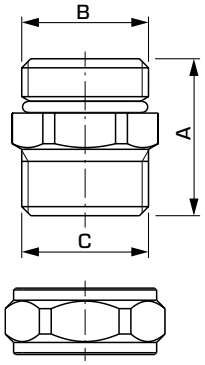

FUNCTION
Draining valves series VDA100 are opened by connecting a hose nipple. The spring-loaded plug is then moved to open position. Outlet connection for hose nipple pursuant to SMS 1077, with packing and wing nut as per SMS 1078 (G 1/2). Input connection is external G 1/2.
